

PUBLIC WORKS COMMITTEE MEETING MINUTES

August 10, 2011

Opened 6:30pm

Present: Jeff Gately, Gary Walkington, Walter Kriese and Terry Grom.

Business.

Terry Grom reported that the pump at the Lisk Drive lift station just had a rock stuck in it. The pump was pulled and fixed on site. There was no need to rebuild the pump at this time.

The photocell on top of the water tower is bad and needs to be replaced. The cost is about \$300.00. Terry will get it ordered asap.

Over the summer all of the fire hydrants were checked and oiled as necessary. The system will be flushed this fall.

The Public Works Committee is researching work order request forms for the Village. There have been issues with contractors performing work in the Village that Public Works is not aware of. This will enable Public Works to be informed of what is going on and where. It will also help in the budgetary Dept. Any contractor will be required to pick up an approved work order before any work can be performed.

Adjourned 7:15pm

Respectfully Submitted

Jeff Gately
