

PUBLIC WORKS COMMITTEE MEETING MINUTES

January 9, 2103

Opened: 6:30pm

Present: Jeff Gately, Walter Kreise, Gary Walkington and Terry Grom.

Approval of November and December meeting minutes

Business:

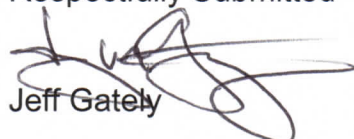

The committee is considering replacing the pump in well one with a higher gpm capacity. The current pump is rated at 375 gpm. We may be able to upgrade to a 500 gpm. We will make a decision based on what Rick Leber thinks is best.

There has been discussion over the years about water rates. We have never raised rates since the system was put on line. We currently have the cheapest water rates in the surrounding communities. We are coming to the conclusion that we will leave the current rate as is, however we will lower the allotted usage. Currently \$26.60 is the rate for 10,000 gallons. We are talking about dropping down to 7000 or 8000. This will bring in added revenue, but will not affect all residents, just the residents who use a lot of water. This may also help with water conservation during the summer months.

Advanced Disposal "Veolia" was the low bidder for hauling services. We are in the process of getting the contract together,

Adjourned 8:50 pm

Respectfully Submitted

Jeff Gately
