

## PUBLIC WORKS COMMITTEE MEETING MINUTES

November 12, 2014

Opened 6:30pm

Present: Jeff Gately, Gary Walkington, Terry Grom, Kevin Barrett and Walter Kriese

Approval of October minutes

Business.

Terry Grom reported that hydrant flushing went well. There is one hydrant that was leaking that John Rucker will repair.

I have been scrambling to try to rent a machine to clear Village sidewalks. The machine that we rented last year has been sold. The only option is to rent to own a ventrac machine that has an enclosed cab and a new snow blower attachment. I have arranged to pay monthly rent as we did last year and then purchase the machine in the next fiscal year.

The trees that were removed this year have been replanted. We will be going into year three of our ash tree removal program.

Cranberry Lake street project is completed, along with the extra patching and resurfacing of White Tail Drive. Very pleased with the results. We are looking to have our Village engineer create another five year road program.

Adjourned 8:00 pm

Respectfully Submitted

  
Jeff Gately
