

April 14th, 2010 Public Works Committee Meeting Minutes

PUBLIC WORKS COMMITTEE MEETING MINUTES

April 14, 2010

Opened 6:30pm

Present: Jeff Gately, Gary Walkington and Terry Grom

Approval of March Minutes

Business discussed as follows.

The dialer in the Cranberry Lake Lift Station has failed and needs to be replaced. I had asked Terry Grom to research into a different type of system, as this is the second time that this unit has failed. We feel for the money that we will replace the unit with the same that we have now, however we can call the unit once a week to check its status, I was unaware that the current unit had this feature and this will satisfy my concerns. The generators were just serviced. They are recommending that the coolant hoses and coolant be replaced at the Well 3 location, and that the battery be replaced at the Well one location. Terry Grom will fax over estimates to me this week. I will talk to Kelly to see who we purchased fuel for the generators from as we need to have both units fueled up.

Adjourned 7:00pm

Respectfully Submitted

Jeff Gately
